December 2025

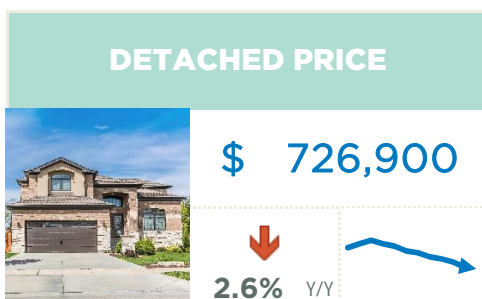

## 2025 housing market shifted to more balanced conditions

**Calgary, Alberta, Jan. 2, 2025** – Following several years of strong price growth, 2025 marked a year of transition thanks to strong demand and limited supply. Due to record high starts, supply levels improved across all aspects of the housing market, just as demand pressure eased due to a reduction in migration levels and heightened uncertainty that persisted throughout the spring market. This helped shift the resale market from one that favoured the seller to one that was more balanced. In 2025, sales reached 22,751 units, down 16 per cent over last year, but in-line with long-term trends. Much of the shift came from the growth in supply. 2025 saw over 40,000 new listings come onto the market, nine per cent higher than last year, causing inventories to rise and driving more balanced conditions.

"Supply levels were expected to rise in 2025. However, the growth was higher than expected especially for apartment condominium and row homes. This weighed on prices in those sectors enough to offset the annual gains reported for both detached and semi-detached homes," said Ann-Marie Lurie, CREB's Chief Economist. "Adjustments in both supply and demand varied across the city, with pockets of the market continuing to experience seller's market conditions versus some areas where the conditions favoured the buyer. This resulted in different price trends based on location, price range and property type."

Overall, the annual average total residential benchmark price in 2025 was \$577,492, two per cent lower than last year's annual average. However, annual detached and semi-detached prices rose by a respective one and three per cent, while apartment and row homes saw prices fall by a respective three and two per cent.

Compared to other districts, the North East reported the largest decline in prices this year. While some of this is related to improved supply across all areas of the city, it is also important to note that the North East district also reported the strongest price growth over the past two years. For the first time in three years, we are heading into the New Year with better inventory levels. Details on what is expected to happen in the market in 2026 will be released at CREB's annual Forecast Conference on Jan. 20, 2026.

### Detached

Detached sales totaled 11,328 in 2025, down by nearly nine per cent compared to last year. Sales eased across all districts in the city, with the steepest declines occurring in the North East, East and City Centre district. However, unlike the City Centre, the North East and East districts also experienced significant gains in inventory compared to long-term trends, driving annual price declines of two per cent. Meanwhile, in the City Centre detached inventory remained well below long-term averages, which likely prevented stronger sales and contributed to the annual price growth of over three per cent. Despite the differing conditions in different areas of the city, slowing sales and rising supply citywide helped move the market into balanced conditions by the second half of the year. The annual average benchmark price was \$752,767, one per cent higher than last year's annual level.

### Semi-Detached

Semi-detached homes represent the smallest segment of the market, accounting for less than 10 per cent of all sales activity. Sales in 2025 were 2,159, eight per cent lower than last year, but slightly higher than long-term trends. Trends for semi-detached homes have been relatively consistent with the detached market. However, it took longer for this segment of the market to shift to more balanced conditions, resulting in stronger annual price gains. In 2025, the average annual benchmark price was \$685,850, nearly three per cent higher than last year. Prices did ease in the North district as competition for new homes weighed on resale activity, but the decline in this district was more than offset by the four per cent gain in the City Centre.

### Row

2025 sales eased by 17 per cent to 3,838 units. Despite the decline, sales were still higher than long-term trends, as row homes are starting to account for a larger share of the overall activity in the city. At the same time, new listings also rose relative to sales, driving inventory gains and taking the pressure off prices. Conditions shifted to more balanced levels relatively early in the year, and by the last quarter conditions ranged from a balanced to a buyer's market depending on the districts of the city. Overall, this contributed to the annual average benchmark price decline of two per cent. While prices were relatively stable in the City Centre, North West, West and East districts, additional supply in the resale market and competition from new homes caused prices to decline by four per cent in the North East and North districts.

### Apartment

Apartment-style homes reported the largest adjustment in price in 2025. Sales declined by 28 per cent compared to the near record high levels achieved last year. While the decline was significant, sales were still over 28 per cent higher than long-term trends. The main cause of the shift in conditions was due to the supply. Over the past three years, there has been a rise in apartment-style starts. While most of the apartment starts were purpose-built rental, they are adding to the supply choice and weighing on the resale market. Resale condominiums saw the market shift in favour of buyers by the second half of the year, with elevated months of supply being reported in most districts of the city. This resulted in relatively persistent downward pressure on prices, causing the annual average benchmark price to decline by nearly three per cent. Price declines were the steepest in the North East nearing five per cent. The only area to report relative stability in the annual price was in the West district.

## DEFINITIONS

**Benchmark Price** - Represents the monthly price of the typical home based on its attributes such as size, location and number of bedrooms.

**MLS® Home Price Index** - Changes in home prices by comparing current price levels relative to January 2005 price level.

**Absorption Rate** - Refers to the ratio between the amount of sales occurring in the market relative to the amount of inventory.

**Months of Supply** - Refers to the ratio between Inventory and sales which represents at the current pace of sales how long it would take to clear existing inventory.

**Detached** - A unit that is not attached to any other unit.

**Semi-detached** - A single dwelling built as one of a pair that share one common wall.

**Row** - A single dwelling attached to each other by a common wall with more than two properties in the complex.

**Attached** - Both row and semi-detached properties.

**Apartment** - A unit within a high rise or low rise condominium building with access through an interior hallway.

**Total Residential** - Includes detached, attached and apartment style properties.

**Exclusions** - Data included in this package do not include activity related to multiple-unit sales, rental, land or leased properties.

## ABOUT CREB®

CREB® is a professional body of more than 8,700 licensed brokers and registered associates. CREB® is dedicated to enhancing the value, integrity and expertise of its REALTOR® members. Our REALTORS® are committed to a high standard of professional conduct, ongoing education, and a strict Code of Ethics and standards of business practice. Any use or reference to CREB® data and statistics must acknowledge CREB® as the source. The board does not generate statistics or analysis of any individual member or company's market share. All MLS® active listings for Calgary and area may be found on the board's website at [www.creb.com](http://www.creb.com). CREB® is a registered trademark of the Calgary Real Estate Board Cooperative. The trademarks MLS® and Multiple Listing Service® are owned by the Canadian Real Estate Association (CREA) and identify the quality of services provided by real estate professionals who are members of CREA. The trademarks REALTOR® and REALTORS® are controlled by CREA and identify real estate professionals who are members of CREA, and subsequently the Alberta Real Estate Association and CREB®, used under licence.
